

Environmental Policy of Mleczarnia Turek Sp. z o.o.

Mleczarnia Turek Sp. z o.o., a recognized producer of high-quality blue cheeses and part of the international Savencia Group, considers environmental responsibility a vital part of its mission and development strategy. In our daily operations, we are guided by the United Nations Sustainable Development Goals, with particular focus on the sustainable use of natural resources and reducing the environmental impact of our production processes on climate, water, soil, and local communities.

Our approach to environmental responsibility is implemented through an environmental management system compliant with the PN-EN ISO 14001:2015 standard, whose effectiveness is continuously enhanced. At Mleczarnia Turek, we prioritise not only compliance with legal and industry standards but also the realisation of ambitious objectives outlined in the Savencia Group's sustainable development strategy and commitments under the Science-Based Targets initiative (SBTi), aimed at achieving genuine reductions in greenhouse gas emissions and reaching climate neutrality.

Aware of the dairy industry's environmental footprint, we implement targeted actions in the following areas:

- Sustainable water management – We employ modern technological solutions to minimise water use and promote its recovery and reuse in specific production processes.
- Reducing greenhouse gas emissions – We modernise equipment, improve energy efficiency, and consistently shift to renewable energy sources.
- Strengthening local supply chains – We work solely with regional milk suppliers, supporting the growth of the local economy and reducing the carbon footprint linked to the production and transportation of raw materials and finished products.

Our aim is to make decisions based on a thorough analysis of their environmental impact and to create lasting benefits for future generations. We believe that sustainable food production is achievable only through the engagement of our employees and business partners, which is why we invest in their education, environmental awareness, and active participation in implementing our environmental goals.

The management of Mleczarnia Turek provides the necessary resources, tools, and support to effectively implement and continually improve the environmental management system. Transparency, open communication—both internal and external—and a collaborative approach with all stakeholders are of key importance to us.

This Environmental Policy is known, understood, and actively implemented by all employees of Mleczarnia Turek Sp. z o.o. and is made available to all interested parties.
